As I mentioned during our phone call just a few minutes ago, I am just trying to get a better understanding of why the PRP Steering Committee thinks these companies are deserving of a 104(e) Information Request and/or a General Notice letter, when their manifests indicate non-hazardous substances.

Let's try to discuss the following entities:

Aerojet-General Corporation
American Spring Wire
Andrews Transporting
Borden Chemical

Adam will be on the phone with me, and we will call you at 2 pm Central time.
Thanks for your help.
